- Requires less wood than 30% recycled paper

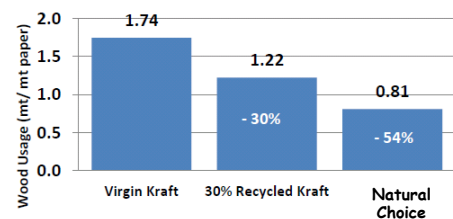

## Daily Use Ideas for Natural Choice Paper

- Everyday copying needs
- Personal printers
- High-speed office laser printers
- Whenever over-engineered archival paper is not required

Natural Choice... "Paper you can feel good about"

## Wood Usage vs Fiber Furnish

Natural Choice paper is produced with thermo-mechanical pulp which contains more organic material from the tree. When exposed to light, Natural Choice paper's shade will gradually shift to its natural (creamy) state letting you know it may be time to follow up, file or recycle.
